Education

Texas A&M University College Station, TX
Bachelor of Science in Computer Science, Minor in Cybersecurity *Expected May 2027*
GPA: 3.89
Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Software Engineering, Database Systems, Computer Systems, Machine Learning, Computer and Network Security

Technical Skills

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, Mongoose
Databases: PostgreSQL, MySQL, MongoDB
Developer Tools & Platforms: Git, GitHub, Docker, GitHub Actions, Postman
Concepts & Technologies: REST APIs, Microsoft Entra, Google OAuth, CI/CD

Experience

Texas A&M University – TechHub College Station, TX
Software Engineer Intern *May 2026 – Present*
- Develop and maintain an internal order-management platform used by seven staff members to process 370+ orders across picking, QA, fulfillment, and delivery workflows.
- Designed and implemented a partial-order workflow automating order splitting, inFlow inventory updates, tracking-number synchronization, and fulfillment-state management.
- Integrated Microsoft Entra authentication and implemented role-based access controls, administrative allowlisting, audit logging, and session-level authorization for REST APIs.
- Built a native Python printing agent to unify picklist printing and asset-tag requests, eliminating manual eligibility checks through automated order validation.
- Resolved fulfillment failures caused by excessive concurrent inFlow API requests by implementing batched asynchronous processing to improve reliability.

Westerman & Associates Houston, TX
IT Intern *June 2025 – August 2025*
- Configured and deployed 20+ client workstations, troubleshooting firmware, device drivers, and enterprise application compatibility.
- Strengthened network security across 5 apartment complexes by configuring AT&T gateway firewall rules to restrict inbound TCP traffic and reduce RDP exposure.
- Supported a law firm's migration from Office 365 to Microsoft 365 by deploying updated applications and resolving Outlook access and account configuration issues.

Aggie Coding Club College Station, TX
Project Manager *September 2024 – December 2024*
- Led a 5-developer team in building a full-stack AI-powered recipe application, coordinating feature development across frontend and backend components.
- Mentored developers in Git, TypeScript, and React while managing task assignments, development milestones, and collaborative workflows.

Projects

NFC CD Library | *JavaScript, Python, C++, ESP32, Supabase* October 2026
- Developed a full-stack digital music library integrating an ESP32 NFC reader with a cloud-backed web application to identify and display physical CD albums.
- Implemented secure device-to-cloud communication using HTTPS, Supabase authentication, and row-level security to synchronize NFC scans with user collections.
- Built an interactive 3D CD collection interface using Three.js, integrating MusicBrainz and Cover Art Archive APIs for album metadata, track listings, and artwork.

HTeaML | *Express.js, Node.js, PostgreSQL, Google OAuth* December 2025
- Developed a full-stack self-ordering application supporting customer and employee-assisted purchase workflows.
- Implemented Google OAuth authentication and role-based dashboards for order processing, menu management, staffing, and sales reporting.
- Integrated translation, voice-ordering, weather, and accessibility functionality through external APIs.

Certifications

CompTIA Security+ (SY0-701) — CompTIA 2025
